

INDEX

S. No.	Name of Practical	Submission Date	Remark
01.	Design a professional resume using templates.	22-09-2025	
02.	Create a Career Oriented Presentation with 7 slides using transitions and animations.	29-09-2025	
03.	Create a social media poster for "DIGITAL AWARENESS WEEK" using canva.	01-10-2025	
04.	Compose & send a professional email with an attachment as "you are applying for an internship, send email to HR with your resume attached".;	06-10-2025	
05.	Design a complete Google Form survey and analyze responses. a) Create a Google Form titled "Student Attendance Report". Include the following question types: ● 5 MCQs ● 1 Rating scale (1–5) ● 1 Short answer 1 Checkbox question b) Customize the theme (header image + color). c) Share the form link with 5 friends and collect responses. d) Generate charts from responses and take screenshots of the analysis page.	11-10-2025	
06.	Demonstrate the creation and management of your digital identity. a) Create a social media profile (LinkedIn preferred).	31-10-2025	

	b) Add a profile photo, short bio, skills, and education details. c) Create a simple post about "My Learning Journey in Digital Literacy." d) Change your privacy settings to: a. Who can see your posts. b. Who can message you		
07.	Using Google Drive or OneDrive: a) Create a new folder named "Unit 3 Practical Work". b) Upload 3 different files (PDF, image, document). c) Organize them in subfolders: Notes, Images, Assignments. d) Share the main folder with your teacher with View Only permission.	13-11-2025	
08.	Identify one real phishing email : A final-year student, Aman, receives a LinkedIn message saying: "You are shortlisted for a Remote Software Developer role at Google. Salary: ₹18 LPA. Pay ₹2,499 as verification fee. Limited seats. Pay now to confirm." <u>ANSWER THE QUESTIONS :-</u> a) What type of cybercrime is happening here? b) List 3 red flags that show it is a scam? c) What should he do to verify if a job offer is real?	19-11-2025	
09.	Create a Google Form Quiz with the following requirements:	24-11-2025	

	a) Convert the form into a Quiz mode with automatic grading. b) Add 5 MCQ questions, each carrying 2 marks. c) Add 1 short answer question that requires manual evaluation. d) Turn ON the setting: a. <i>Limit to 1 response</i> b. <i>Shuffle question order</i> c. <i>Release marks after manual review</i> e) Add a timer add-on (like form presenter) and set up a 10-minute time limit. f) Finally, send the quiz link and view the response summary.		
10.	Ask ChatGPT OR Google Gemini to generate a 100–120 word paragraph on: “Is online learning better than offline learning for college students?” a) Run the AI-generated text through Grammarly and any plagiarism-check tool. b) Now manually search online to check if similar sentences exist on blogs or articles. c) Identify 2–3 biased statements in the AI answer, such as: i. Over-generalizations ii. One-sided opinions iii. Unproven claims d) Rewrite the entire paragraph in a neutral and balanced way, using AI only for grammar suggestions. e) Submit 3 screenshots: i. Plagiarism check result ii. Grammarly suggestion page iii. Original AI	29-11-2025	

	paragraph vs your rewritten unbiased version		
11.	To compare AI-generated content with student-created content and understand limitations of AI. a) Write a 100–150 word paragraph on the topic: “Will AI replace jobs or change them?” (This must be written by the student.) b) Ask any AI tool (ChatGPT/Gemini/Copilot) to write the same topic. c) In your practical copy, create a Comparison Table with the headings: I. Human-Generated Content	03-12-2025	
12.	Create a new NotebookLM project titled: “My Chapter Revision Notes.” a) Upload multiple sources (any 2) such as: i. PDF notes ii. Web articles iii. Text copied into NotebookLM b) Ask NotebookLM to: i. Create a combined study guide using all sources. ii. Generate flashcards for quick revision. iii. Create a concept map or explanation of the topic. c) Manually check for: i. Any incorrect facts ii. Repeated information	10-12-2025	

	iii. Missing important points d) Attach 3 screenshots from NotebookLM: i. Combined study guide ii. Flashcards iii. Concept map / explanation		
13.	Create a complete Student Result Management workbook. a) Create a new workbook with 3 sheets renamed as: a. <i>Student_Data</i> b. <i>Marks_Analysis</i> c. <i>Charts</i> b) In <i>Student_Data</i>, enter a list of 15 students with: Name, Roll No, Class, City, Subject1, Subject2, Subject3. c) Use Flash Fill to split “Full Name” into “First Name” and “Last Name”. d) Use Find & Replace to replace city name “Delhi” with correct “Delhi”. e) Use IF function to calculate Pass/Fail (Pass = total $\geq$ 120). f) Use COUNTIF to find how many students belong to “Delhi”. g) Use AVERAGE, MAX, MIN to analyze marks in the <i>Marks_Analysis</i> sheet. h) On the <i>Charts</i> sheet, create: i. A Bar Chart showing marks of any one subject. ii. A Pie Chart showing	19-12-2025	

	percentage of pass vs fail. i) Apply Conditional Formatting to highlight marks < 40 in red. j) Convert the table into a formatted Excel Table.		
14.	Build a workbook for managing and analyzing sales data of a small store. a) Create a workbook with sheets: I. <i>Store_Sales</i> II. <i>Summary</i> III. <i>Charts</i> b) Import a CSV sales file (or create a sample table) containing: Date, Product, Category, Quantity, Price, Total Sales. c) Use Sort (A→Z, Z→A) to organize products by name and category. d) Apply Filter to view only “Electronics” category. e) Use SUMIF to find total sales for a selected product (e.g., “Headphones”). f) Use LEFT, RIGHT, MID to extract: I. First 3 letters of the product name II. Last 2 letters of the category g) Find the highest and lowest sales value using MAX/MIN. h) Prepare a monthly sales summary in the <i>Summary</i> sheet using AVERAGE & SUM. i) Create a Line Chart of month-wise total sales in the <i>Charts</i> sheet. j) Apply sheet protection so data	24-10-2025	

	cannot be edited accidentally.		
15.	Create a complete personal financial planner workbook. a) Create and rename sheets as: a. <i>Expenses</i> b. <i>Budget</i> c. <i>Charts</i> b) Enter at least 20 rows of expense data: Date, Category, Expense Detail, Amount, Payment Method. c) Use Data Validation dropdown to create a category list (Food, Travel, Fees, Shopping, Other). d) Use Remove Duplicates on the Category column if repeated incorrectly. e) Use SUMIF to calculate total spending for each category. f) In the <i>Budget</i> sheet, create the monthly budget and compare with actual expenses using: $\text{Difference} = \text{Budget} - \text{Actual (formula required)}$ g) Highlight expenses above ₹2000 using Conditional Formatting. h) Create: i. A Pie Chart showing category-wise spending ii. A Bar Chart comparing <i>Budget vs Actual</i> iii. Use Flash Fill to separate date into Day / Month / Year if needed. Also explain its detail	29-12-2025

ABOUT ME

AI & ML student with Master's degree specializing in Artificial Intelligence and Machine Learning. Proven leader in live broadcasting operations and data-driven analytics with expertise in scalable system architecture and team management.

EDUCATION

Hemchand University | 2021-2023

BCA (BACHELORS OF COMPUTER APPLICATIONS)

Rungta University | 2025 (Persuing)

MCA AI/ML (MASTERS OF COMPUTER APPLICATION)

WORK EXPERIENCE

ART GRAMI | MAY 2023 - OCT 2023

SOCIAL MEDIA ANALYST

As a social media analyst, the experience involves diving deeply into data from various platforms to understand trends, audience behavior, and engagement metrics. It requires a keen eye for detail and proficiency in analytics tools to interpret data and provide actionable insights.

108 Live Youtube Channel & Startup | 2024 - 2025

Freelance & Team Lead

Led 5+ member team in developing live broadcasting platform from inception, achieving 99.9% uptime for 10,000+ concurrent users using vMix . Optimized YouTube content strategy through A/B testing and analytics, increasing engagement by 35%. Established 10+ strategic partnerships, enhancing cross-platform collaboration and project reach

PROJECT

Tower of Learning (Build In Pec Hack 2025) (Git Repo Link -https://github.com/Ansh245/Smocky_Coderz-TOL)

Built a gamified virtual learning platform with RPG-style progression inspired by Tower of God. Implemented level-based learning (1-100 levels), adaptive quizzes, XP/HP mechanics, boss fights every 10 levels , and collaborative friend challenges. Integrated real-time collaboration features and analytics to track engagement , attention, and performance.

CERTIFICATES

Practical – 02

Aim : Create a Career Oriented Presentation with 7 slides using transitions and animations.

Slide 1:

The Art and Impact of an Animation Artist

Slide 2:

From Sketch to Screen: The Animation Artist's Journey

Creative Storytelling

Animation blends storytelling, art, and technology to bring ideas to life, transforming narratives into dynamic visual experiences.

Intentional Craft

Every frame is crafted with intention, combining meticulous creativity and precision to achieve seamless motion and expression.

Shaping Emotions

Behind every animated scene is a passionate artist shaping emotions and movement, breathing life into characters and worlds.

Slide 3:

Essential Skills That Define an Animation Artist

Foundational Artistry

- Mastery of drawing, timing, and visual storytelling fundamentals.
- Deep understanding of artistic principles and character anatomy.

Technical Proficiency

- Expertise in software like Adobe Animate, Toon Boom Harmony, Blender, and After Effects.
- Familiarity with various animation techniques, from 2D to 3D.

Creative Vision

- Strong understanding of character design, motion principles, and narrative pacing.
- Ability to translate concepts into compelling visual sequences.

Slide 4:

Tools of the Trade: Powering Creativity with Technology

Industry-Standard Software

Enables smooth, dynamic animations and effects, streamlining production workflows.

Traditional & Digital Balance

Balancing hand-drawn techniques with digital innovation fosters unique artistic styles and expressions.

AI-Assisted Tools

Emerging tools like AI-assisted animation and 3D modeling expand creative possibilities and efficiency.

3D Modeling & Rendering

Allows for complex character rigging, environmental design, and realistic visual output.

Digital Drawing Tablets

Offer precise control and fluid drawing experiences, bridging traditional art with digital platforms.

Slide 5:

Animation in Action: Real-World Impact and Success Stories

From captivating commercials to award-winning films, animation profoundly impacts audiences worldwide. Collaborations with major studios like Pixar and DreamWorks demonstrate its power, while its versatility shines in education, marketing, and entertainment, proving animation is more than just cartoons—it's a powerful medium for storytelling and connection.

Slide 6:

Best Practices for Animated Presentations

- Purposeful Animation**
Use subtle, purposeful animations to highlight key points without distracting the audience, guiding their focus effectively.
- Smooth Transitions**
Maintain smooth and consistent transitions between slides and elements to ensure a fluid viewing experience and audience engagement.
- Clarity Through Motion**
Leverage motion to simplify complex ideas, breaking them down into digestible visual segments, and enhancing overall storytelling clarity.
- Visual Hierarchy**
Employ animation to reinforce visual hierarchy, drawing attention to the most critical information and guiding the viewer's eye.

Slide 7:

Bringing Stories to Life: Your Next Animation Project Awaits

Animation artists transform imagination into unforgettable visual experiences, crafting worlds and characters that resonate deeply with audiences. Whether for feature films, immersive games, dynamic digital media, or impactful marketing campaigns, the possibilities are limitless.

Let's collaborate to create the next captivating story that moves hearts and minds, leaving a lasting impression and bringing your vision vividly to life.

To
Hiring Manager

Respected Sir/Madam,

I am writing to apply for an internship opportunity in your organisation. I am currently pursuing my MCA (Master of Computer Applications) and am looking to gain practical industry experience to strengthen my technical and professional skills.

I have a strong foundation in programming and development concepts including Java, Python, DBMS, SQL, HTML, CSS, and data structures. Along with academics, I have worked on small projects that helped me understand real-world problem solving, teamwork, and disciplined execution. I am particularly interested in learning through hands-on work under professional guidance.

I am a quick learner, disciplined, and open to feedback. I am confident that this internship will allow me to contribute meaningfully while improving my skills and understanding of industry standards. I am available to join immediately and can commit fully to the internship duration.

I would appreciate the opportunity to discuss this further. Please find my resume attached for your review.

Thank you for your time and consideration.

Yours sincerely,
Ansh Giri Goswami

Aim : Design a complete Google Form survey and analyze responses.

1. On average, what is your current attendance percentage?

5 responses

2. Which time slot are you most likely to miss?

5 responses

3. How do you usually commute to college?

5 responses

4. Do you think attendance should be mandatory for exam eligibility?

5 responses

5. Which type of class do you attend most regularly?

5 responses

6. Select all reasons that have caused you to miss class recently.

5 responses

7. What is one suggestion you have to improve student attendance?

5 responses

I don't have an any idea.
JUST BE CONSISTENT
nothing
gyj
Classes should be more interactive and engaging.

8. On a scale of 1 to 10, how do you rate this assessment?

5 responses

Practical – 07

Aim : Using Google Drive or OneDrive .

Practical – 08

Aim : Identify one real phishing email : A final-year student, Aman, receives a LinkedIn message saying.

a) What type of cybercrime is happening here?

Ans:

Phishing-based Online Job Recruitment Fraud (Social Engineering Attack)

The attacker is **impersonating Google on LinkedIn** and using **social engineering** to extract money from the victim.

b) List 3 red flags that show it is a scam?

Ans:

1. **Demand for money (₹2,499 verification fee):**

Google and other MNCs **never charge any fee** for recruitment, verification, or interviews.

2. **No official recruitment process mentioned:**

There is **no interview, coding test, HR round, or offer letter**, which is mandatory for Google hiring.

3. **Psychological pressure tactics:**

Phrases like **“Limited seats”** and **“Pay now to confirm”** are used to create panic and force quick payment.

c) What should he do to verify if a job offer is real?

Ans:

1. Search the role on **careers.google.com** (Google’s official hiring portal).
2. Check the sender’s profile carefully — real recruiters use **verified company emails (@google.com)**, not payment links.
3. Cross-verify by contacting **Google HR via official website or LinkedIn verified pages** and report the message as a scam.

Aim : Ask ChatGPT OR Google Gemini to generate a 100–120 word paragraph on :

Online learning offers flexibility and convenience that many college students prefer over traditional classroom settings, making it a better option for those who juggle work or personal commitments. It allows students to access materials anytime and learn at their own pace, which can improve retention and reduce stress. Additionally, online education often uses interactive tools and multimedia that enhance engagement. However, some students struggle with self-discipline and miss face-to-face interaction, which is an essential part of social learning. Despite these challenges, many believe that online learning's adaptability and technological advantages make it a superior choice for college students compared to offline learning.

Writing quality 98

All 1 Grammar ✓ Clarity Delivery ✓

Improve wording
anytime

Online learning provides flexibility and access to course materials from different locations, which can be useful for students with varying schedules. Some college students find this format helpful because it allows them to review lectures at their own pace. Online platforms may also include multimedia tools that support different learning styles. However, other students prefer offline learning because in-person classes offer direct interaction, structured routines, and immediate feedback from instructors. Both online and offline learning have advantages and challenges, and their effectiveness can depend on individual preferences, course design, and student motivation. Therefore, neither mode is universally better for all college students; each may be more suitable in different situations.

“Will AI replace jobs or change them?”

As we live in the era of AI, the most asked question is whether AI will replace our jobs. My answer to this question is that as we progress through new technology and the era of innovation, an AI will more likely change the job rather than replace it. While AI can do lots of work in a very small amount of time without getting tired, some jobs require human creativity, emotional intelligence, critical thinking, and moral judgment—skills that AI doesn't have. For example, AI can quickly analyze medical data that is necessary for human doctors to make accurate diagnoses, provide patient care, and inform decision-making. AI is a tool that can help us do our tasks in a much more efficient and productive way. AI will reduce some low-skill jobs, creating challenges for workers. However, it will create new jobs such as AI development, data analysis, cybersecurity, and AI ethics. Overall, AI will not replace our jobs; it represents the shift in the nature of work, making adaptability and continuous learning much more important than ever.

The screenshot displays a plagiarism checker interface with three tabs: "Plagiarism Checker", "Check Grammar", and "AI Detector". The "Plagiarism Checker" tab is active. On the left, under "Scan Properties", it shows: Sources Found: 0, Words: 184, and Characters: 1083. A "View More Details" button is below. The main area shows a "Plagiarism 0%" result with three sub-metrics: 0% Exact Match, 0% Partial Match, and 100% Unique. Below the text input area, the scanned text is displayed: "Will AI replace jobs or change them?" followed by a paragraph discussing AI's impact on jobs. To the right, there is an illustration of a person at a desk with a laptop and a sign that says "Congratulations! No Plagiarism Found".

Property	Value

AI Detector by Grammarly

Navigate responsible AI use with our AI checker, trained to identify AI-generated text. A clear score shows how much of your work appears to be written with AI so you can submit it with peace of mind.

Write with confidence using Grammarly's AI-powered grammar checker. Harness advanced AI to spot grammatical errors, spelling mistakes, and punctuation issues while refining clarity and enhancing your writing style.

AI Generated: -

Artificial Intelligence is more likely to change jobs than completely replace them. While AI can automate repetitive and routine tasks, many roles still require human creativity, emotional intelligence, critical thinking, and ethical judgment—skills that machines cannot fully replicate. For example, AI can assist doctors by analyzing medical data, but human doctors are still essential for diagnosis, decision-making, and patient care. Similarly, AI tools help teachers, designers, and programmers work more efficiently rather than eliminating their roles. At the same time, AI will reduce demand for certain low-skill or repetitive jobs, creating challenges for workers who lack opportunities to reskill. However, it will also generate new careers in areas such as AI development, data analysis, cybersecurity, and AI ethics. Overall, AI represents a shift in the nature of work, making adaptability and continuous learning more important than ever.

AI Detector by Grammarly

Navigate responsible AI use with our AI checker, trained to identify AI-generated text. A clear score shows how much of your work appears to be written with AI so you can submit it with peace of mind.

Plagiarism Checker

Ensure every word is your own with Grammarly's AI-powered plagiarism checker, which uses advanced AI to detect plagiarism in your text and check for other writing issues.

Comparison: AI-Generated Text vs Handwritten Text

Aspect	AI-Generated Text	Handwritten (Human-Written) Text
Overall Position	Argues AI will change jobs, not replace them	Same view expressed personally
Writing Style	Formal and academic	Semi-formal and conversational
Personal Voice	Neutral and impersonal	Personal opinion included
Sentence Structure	Concise and well-balanced	Slightly longer, minor repetition
Language Accuracy	Highly accurate	Mostly accurate
Use of Examples	General and explanatory	Narrative and student-like
Emotional Touch	Limited	Stronger human element
Bias	Balanced and neutral	Slightly opinion-based
Originality Feel	Generic or AI-like	Authentic and natural
Exam Suitability	Good for reference	Ideal for handwritten exams

Category-wise Spending

Budget vs Actual

The expense data, consisting of 20 transactions, shows a total spending of 31,818 with an average transaction amount of 1,590.9. The analysis of this data reveals key patterns in how money is spent and which payment methods are most frequently used. Key Takeaways from Expense Analysis

1. Spending is Highly Concentrated in a Few Categories

The top three categories, Shopping, Fees, and Travel, account for over 83% of the total recorded expenses, indicating where the majority of the budget is allocated.

- Shopping is the highest spending category, totaling 9,900.
- Fees is the second largest category at 9,200, which includes significant one-time payments like the Exam Fee (3,000) and College Fee (6,000).
- Travel follows with 7,500, mainly driven by major costs such as the Flight Ticket (5,000).
- Food expenses are a smaller portion of the total, amounting to 3,170.

1. UPI and Card Payments Dominate Transactions

Digital payment methods like UPI and Card are the primary ways expenses are settled, representing over 80% of the total amount spent.

- UPI is the most preferred payment method, accounting for the largest total expenditure of 14,698.
- Card payments are the second most used, with a total of 11,000 spent.
- Cash is used for the lowest total amount, at 6,120, suggesting a preference for digital transactions, potentially for larger amounts.

The following charts illustrate the distribution of expenses:

Total Expense by Category

This bar chart shows the total amount spent in each expense category, clearly highlighting Shopping, Fees, and Travel as the largest contributors to overall spending.

Total Expense by Payment Method

This chart visualizes the total amount spent using each payment method, demonstrating the dominance of UPI and Card payments.
